Support for the Città di vico Equense's application to become a UNESCO Creative City of Gastronomy

Esteemed Mayor Aiello,

It was with great pleasure that we learned of the initiative taken by the municipality of Vico Equense to apply to the 2023 call to become a City of Gastronomy within the frame of the Network of UNESCO Creative Cities.

TEGing, a project for Italian food and wine tourism, develops, thanks to project networks, Affiliates and Partners, projects for destinations.

It supports the activity of territories and supports third-party planning in order to organize and structure the destination, to create operational networks in synergy with existing and developing public and private realities.

Incoming, Training, Export are some of TEGing's areas of activity developed with respect to sustainability and the achievement of the 17 UN goals.

International Partners guarantee the project's promotional work for Italy and Made in Italy.

Confident that the presence of the City of Vico Equense can add further expertise and enrichment to the already prestigious international network of Creative Cities, we therefore express all our support to its candidacy, and hope for this important achievement.

Kindest regards,

Paola Puzzovio

Founder and Project Manager TEGing
